Elective Policy for residents from the University of Lyon

The Anatomical Pathology Residency Program will be able to accept Residents from the University of Lyon under the following guidelines:

1. The resident must apply directly to the program six months prior to the start date intended for elective time for program approval. Once approved by the program, candidate must contact PGME for final approval.
2. PGME will notify program of the final approval so that the resident can be scheduled to service accordingly.
3. All documents of the resident should be sent to the program in English. If this is not possible, the documents will be translated by the PGME office at the University of Ottawa. Documents should include, but not limited to, recent CV, two letters of references, one of which must be from the resident’s Program Director and the other, from a staff that the resident has worked with during residency training.
4. The resident must show evidence of proficiency in English language in both oral and written.
5. The candidate will need to go through a pre-elective interview with the Program Director or his/her delegate.
6. The resident will rotate in the following subspecialties during their six month elective:
   - Two months in Surgical Pathology at the Ottawa Hospital (TOH)
   - One month in Autopsy at the Ottawa Hospital (TOH)
   - One month in Cytology (sign-out sessions) at the Ottawa Hospital
   - One month in Pediatric Pathology at the Children Hospital of Eastern Ontario (CHEO)
   - One month in research at CHEO
