Goals and Objectives for Papillary Lesions of the Breast
August 10, 2015

Shahid Islam, MD, PhD, FRCPC

Lecture participants should:

Medical Expert:
- Acquire knowledge pertaining to the epidemiology of these lesions, which include but not limited to intraductal papilloma, atypical papilloma (associated with ADH and DCIS), papillary DCIS, encapsulated papillary carcinoma and solid papillary carcinoma
- Acquire knowledge pertaining to risk factors for these lesions
- Acquire knowledge regarding the gross descriptions of these lesions
- Acquire knowledge in the interpretation of these lesions in the context of CNB and resected specimens
- Acquire knowledge in formulating a differential diagnosis in the interpretation of these lesions
- Acquire knowledge of the immunohistochemical testing of these lesions

Communicator:
- Acquire knowledge on the importance of gathering clinical information pertaining to the diagnosis of these lesions
- Acquire knowledge on how to formulate clear, concise and complete pathologic reports pertaining to these lesions

Collaborator:
- Acquire knowledge on the role of intra and interdepartmental consultations in the pathologic diagnosis of these lesions
- Acquire knowledge regarding the role of the pathologist in tumour board presentations-radiologic and pathologic discordance and concordance

Manager:
- Acquire knowledge of the importance of quality assurance and quality control measures for the diagnosis of these lesions including pre-analytical, analytical and post-analytical variables
- Acquire knowledge on understanding the value of proficiency testing of immunohistochemistry used in the diagnosis of these lesions
Health Advocate:
- Acquire knowledge on understanding the impact of a diagnosis of these lesions

Professional:
- Acquire knowledge on when to appropriately consult an expert in breast pathology

Scholar:
- Acquire knowledge on relevant sources of information (journals, textbooks, web-based resources) for reviewing literature pertaining to these lesions
- Acquire knowledge on possible research project ideas in the field of these lesions
