

Department of Psychiatry
University Round

*Identification of Risk and Early
Interventions to Prevent Major Mood and
Psychotic Disorders*

Dr. Rudolf Uher

Canada Research Chair in Early Intervention in Psychiatry, University of Dalhousie

Wednesday, February 10th, 2016

12:00 - 1:00 PM

Auditorium, Royal Ottawa Mental Health Centre, 1145 Carling Ave.

Learning Objectives:

1. Quantify the risk for developing major mood or psychotic disorders in offspring of one or two affected parents.
2. List four childhood antecedents that precede and predict the onset of major mood and psychotic disorders.
3. Evaluate the potential benefits of pre-emptive early intervention in youth at risk of severe mental illness.
