"RECOVERY FROM INJURY"

Wednesday, November 28, 2018  7:00 AM to 8:00 AM
General campus Auditorium

Video conferenced to the Civic campus, Fisher room & Executive Boardroom

**Objectives**

1. Explain the difference between disease and illness and the difference between nociception and pain.
2. List the psychological and social determinants of illness that account for variation in illness for a given disease and variation pain intensity for a given nociception.
3. Recognize the verbal and nonverbal signs of stress, distress, and less effective coping strategies.
4. Design effective communication and management strategies that facilitate and enhance recovery from injury.
